## **DETAILED ACTION**

### **Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, 30-56, 61-70, & 71-79 drawn to a diagnostic kit comprising of a plurality of applicators containing different substances.
- II. Claims 26-29 & 57-60 drawn to methods for diagnosing allergies.

The inventions are distinct because of the following reason:

Inventions in Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the apparatus in Group I can be used in a materially different process of using than what is claimed in Group II. For instance, the apparatus in Group I can be used for storing and analyzing samples of bodily fluids or matter.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anuradha Roy whose telephone number is (571) 272-
